

For Selection committee member

Brilliant New Station Naming Project Secretariat

About New Station Name selection method.

Dear Sirs The Selection Committee, I think it will be more and more successful.

There were a lot of applications for this new station name offer.
All proposals are wonderful and the selection is extremely difficult.
Therefore, we have decided to adopt the "Jugem method" for this screening.

The Jugem method is a naming method in which a single name is completed by connecting as many words as possible of your application. We are confident that the selection committee members will be able to devise a station name suitable for the bright future.
However, due to the characteristics of the station name, this time, the condition of the selection will be "Reading in a single breath."

In the meantime, we will announce the selection method of the station name in this new station naming project. Please make sure to participate in the selection committee after confirmation.

Best regards.

■ Purpose

As a selection committee member of the new station naming project, players will add words to the station name with the aim of completing the station name as long as possible.

There is only one iron bowl. "You can read the station name in a single breath."
Not only long, readability is also important. In addition, you will need "interesting", "surprising" and "advancement" to become a familiar station name.

Let's skillfully spin 180 kinds of words, and change the record of the No. 1 station in Japan and No. 1 in the world, and complete the station name suitable for a bright future!

Hopefully, the future will be the name of the station that will be familiar for a long time ...

■ Set Contents

[PLACE NAME CARD] 10 cards.

One is a blank card. Write your favorite Place name.

The back of the place name card is the game summary (but write in Japanese).

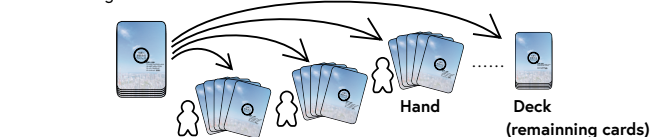

[WORD CARD] 90 cards.

Two words are described in one card.

■ Preparation

MIX ALL THE WORD CARDS, shuffle well, and distribute 5 cards to each player.

The remaining cards become a deck.

Pick a PLACE NAME CARD randomly and place it face up in play.

The remaining PLACE NAME CARDS are turned face down. Please use it to check the game summary.

Decide the start player in some way.

For example: People who recently went to Takanawa-Gateway Station.

Now you are ready! Let's start the game!

■ How to play the game

Proceed from the starting player clockwise.

Repeat this until the end of the game.

■ How to proceed

1. Add a word to the station name

Choose a WORD CARD from your hand and add it to play card.

<How to place a WORD CARD>

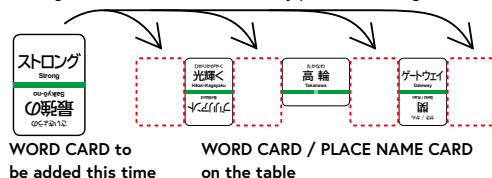

The WORD CARD contains two words.

Make the word you want to use face up (in the same direction as your place card).

Place it on either "before", "between" or "after" the cards in play.

You must not change the direction of cards already placed, or change the order.

2. Read the station name

Read the station name twice. The station name is read out in a single breath. You may take a breath between the first and second readings.

For example: Next station is "Hikari-Kagayaku Takanawa Strong Gateway", "Hikari-Kagayaku Takanawa Strong Gateway".

If you get stuck in your words or make a mistake reading the station name, it is a reading failure.

<If your fail to read>

Choose a WORD CARD from your hand and place it face down in front of you.

This card can not be used until the end of the game.

After that, read the station name twice again.

If you fail to read out with a face-down card in front of you, then THE GAME IS OVER.

3. Draw the WORD CARD

Draw a WORD CARD from the deck and add it to your hand.

If there are no cards in the deck, you will not draw a WORD CARD.

The turn moves to the player on the left.

■ End of the games

The station name that failed to read out is unfortunately rejected. The WORD CARD added by that player is removed, and the station name devised by the player in the last turn is adopted, that is, the winner of this game!

In honor of the winner, let all players sing the adopted station name!

Also, it is very rare, but the player who read the station name last will be the winner if all the decks and hands are exhausted.

■ Option : Selection of THE BEST SELECTION COMMITTEE

It is a way to play the game several times and decide the most excellent selection committee.

The winner of the game gets the PLACE NAME CARD used in the game. Choose a new PLACE NAME CARD and start the next game.

The player who has won 2 PLACE NAME CARDS will be selected as THE BEST SELECTION COMMITTEE!
